CAREER OBJECTIVE

Third-year Computer Science and Engineering student with hands-on experience in Python, Java, C, JavaScript, React, SQL, and web application development. Strong foundation in object-oriented programming, data structures, algorithms, databases, and problem-solving. Experienced in developing software projects, learning new technologies quickly, and working through technical challenges to build practical solutions.

EDUCATION

Nehru Institute of Technology — B.E. Computer Science and Engineering | 2024 – 2028

St. Michaels AIHSS, Kannur — High School & Higher Secondary Education | 2021 – 2024

TECHNICAL SKILLS

Programming	Python, Java, C, JavaScript
Web Development	HTML, CSS, React, Tailwind CSS, Vite, React Router
Database	PostgreSQL, MySQL, SQL, Relational Database Concepts
Computer Science	Object-Oriented Programming, Data Structures, Algorithms, Problem Solving, Complexity Analysis
Tools & Technologies	Git, GitHub, Docker, Jenkins, AWS EC2, Linux
Other	REST APIs, CI/CD, Browser Extension APIs

PROJECTS

Labourshaala — Local Worker Service Platform

React | JavaScript | Tailwind CSS | Vite | GitHub

- Developed a web platform prototype connecting customers with local service providers such as plumbers, gardeners, and other workers.
- Implemented worker listing, search, worker details, booking, and dashboard workflows using React and React Router.
- Designed reusable UI components and booking state management for a responsive user experience.
- Applied structured problem-solving to implement application workflows and refine features during development.

Browsecure — Browser Security Extension

JavaScript | HTML | CSS | Browser Extension APIs

- Developed a browser security extension concept focused on improving user awareness and protection while browsing.
- Implemented browser-side functionality for identifying potentially risky web activity.
- Designed a user-friendly interface using HTML, CSS, and JavaScript.
- Debugged and refined application functionality while working with browser extension APIs.

Hospital Management System — CI/CD Deployment

Python (Flask) | Jenkins | Docker | AWS EC2 | Git | GitHub

- Developed a Flask-based hospital management web application with patient records, doctor profiles, appointment scheduling, and emergency contact modules.
- Built an automated Jenkins CI/CD pipeline connected with GitHub for application builds and deployments.
- Containerized the application using Docker for consistent deployment across environments.
- Deployed the containerized application on AWS EC2 and configured security groups and network access.
- Integrated GitHub, Jenkins, Docker, and AWS EC2 into an end-to-end development and deployment workflow.

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- NPTEL — Introduction to Soft Computing
- NPTEL — Artificial Intelligence: Concepts and Techniques
- NPTEL — Artificial Intelligence: Knowledge Representation and Reasoning
- Coursera — Machine Learning for All
- Coursera — Big Data Emerging Technologies
- Microsoft — Introduction to Generative AI
- Intra College Technical Symposium — Techquest 2025
- Boomibot — Affordable Automation for Farmers, AICTE NIT
- Dynamic Cyber Risk Modeling — Paper Presentation, Dhanalakshmi College

ADDITIONAL SKILLS

- Strong analytical and problem-solving abilities
- Quick learner with the ability to adapt to new technologies
- Ability to work independently and take initiative
- Comfortable navigating ambiguous technical problems
- Ability to communicate technical challenges and proposed solutions clearly

LANGUAGES

English | Malayalam | Hindi | Tamil
